

Milorganite® Organic Fertilizer

WHEN TO USE:
Spring to Fall

Iron is a critical part of greening your lawn. Milorganite® 5-2-0 fertilizer contains 4% iron. Grass leaves take in this iron, giving them a deep green color. However, unlike high amounts of nitrogen fertilizer, iron does not make plants grow fast. The result is a lawn with the color you desire without excessive growth (and mowing!). For the best part, this deep green color stays with the lawn through hot, dry summer months.

Milorganite organic fertilizer can also be used to feed your garden, flower beds, shrubs and trees.

5-2-0
